

Helpscript* Program

* Formerly known as Smart Rxassist (same program, new name as of 11/22/24)

Program Features

- Helpscript is a free program that helps lower the out-of-pocket costs of specialty medications to \$0 for eligible members.
- In some cases, you may have to pay a small copay but will automatically receive a reimbursement check for the amount you paid within 45 days.
- Medications eligible for the program are subject to change and are not a guarantee of coverage. Prescription drug formulary and prior authorization requirements still apply.

Eligibility

- Not all insurance plans are eligible for this program.
- Program exclusions include:
 - Age 65 years or older
 - Enrollment in a Medicare or Medicaid plan
 - Enrollment in a Washington-based health plan
 - Enrollment in a Health Savings Account (HSA) plan
- Because this program provides the medication at no cost to you, the cost of the medication does not apply to your annual deductible or copay requirements.

Enrollment and Participation

- You are automatically enrolled in the program if you are enrolled in an eligible plan and take an eligible specialty medication in the Helpscript program.
- If you are filling an eligible medication in the Helpscript program, a patient advocate may reach out to you to complete program enrollment.

The medications currently eligible for the Helpscript program are listed starting on page 2.

For questions about this program, please contact a Helpscript Patient Advocate at **833-798-6732**.

Helpscript Program - Eligible Specialty Medications as of 12/01/2024.

Note: Medications eligible for the program are subject to change.
